

## D.1. Mustang Survival MD3031 w/ Survival Equipment Pocket

### D.1.g Performance Qualification Standard

Crewmember: \_\_\_\_\_ Date: \_\_\_\_\_

In some weather conditions, the chemical bobbin may deteriorate in less than 30 days. Commanding Officers/Officers in Charge should consider training their crews to deflate, rearm and stow the bladder after inadvertent inflations. In addition, inadvertent inflations can cause a user to become temporarily disoriented. Training should include donning the vest and inflating to ensure users are aware of how rapidly the bladder expands.
